WELCOME LETTER

The 17th Congress of the International Union for Prehistoric and Protohistoric Sciences will be held in the city of Burgos from the 1st to the 7th of September 2014. Organised by the Atapuerca Foundation, with the backdrop of the investigations at the archaeological sites of the Sierra de Atapuerca, the congress's schedule includes over 1600 communications in 119 work sessions. It will bring together a large number of experts who are working on all five continents in all the spheres of analysis of prehistoric and protohistoric sciences. The lines of research that will be dealt with encompass everything from primitive human adaptation to the environment and the acquisition of basic resources, to the complexity of the social organisation of the first urban cultures.

We would like to welcome all the researchers who will come together in Burgos during the first week of September 2014 to debate the most topical issues in the world of Prehistory and Protohistory, and whose works are reflected in the scientific programme and programme of activities which we present.

The University of Burgos will be the host institution of the congress. The scientific sessions and many of the social and cultural activities organised alongside the congress will take place in the classrooms and lecture halls of its Law and Economics faculties, on the San Amaro Campus. It is a compact area, which should help people to interact, discuss and debate inside and outside the conference rooms.

The programme begins with the inauguration ceremony, which occupies the entire morning of Monday the 1st of September and which will end with the inaugural lecture, the first of the thematic lectures that have been prepared to complement the scientific sessions. The scientific sessions and the committee meetings will take place from Monday afternoon on and for the rest of the week. A daily public lecture, presenting a notable sphere of research and given by a representative of the scientific community of each one of the continents, has been scheduled. All of them will be held on the San Amaro Campus except the one on Wednesday, which will take place in the Evolution Forum in the centre of the city of Burgos. In this way, the congress wants to open itself up to the city, offering activities through which its citizens can find out, first-hand, about the reality of cutting-edge science.

Finally, the aforementioned scientific and cultural activities will be complemented by a series of excursions scheduled for the Wednesday, which will enable the congress participants to discover the heritage of Castile and Leon. Let's not forget the synergy of the congress and the research at Atapuerca, which will be materialised in the visits to the archaeological sites and the Evolution Museum on Saturday and Sunday.

We hope that the programme we introduce here will help to advance science and its interaction with society, and that the complementary activities will prove of interest to the congress participants, the people of Burgos and society in general.

Welcome to Burgos.

3. *Breaking uniformities: ethnic indicators in pre-roman central Spain.*

Arenas Esteban, Jesús Alberto (Universidad a Distancia de Madrid)

jesusalberto.arenas@udima.es

Pre-Roman communities of the eastern Spanish Plateau have traditionally been categorized under the generic name of Celtiberians. This ethnonym was coined by historians who accompanied the Roman troops in their confrontation with the Carthaginians during the Second Punic War. Hence, it is an etic interpretation of a complex cultural reality, in which foreign observers identified cultural traits they had met previously in other places: the Celtic world in central and western Europe and the "Mediterranean" Iberian Culture of the eastern coast of the Iberian Peninsula.
